

The Terminal Boosts and
Advertises Richmond, direct-
ly increasing property values.

THE RICHMOND TERMINAL

Richmond's oldest news-
paper; has the confidence
and support of pioneers.

VOL. XXIII.

RICHMOND, CALIFORNIA, FRIDAY, NOVEMBER 12, 1926

No. 46

Armistice Day Quiet; Wharf Referendum

Santa Fe Railroad Co. Increase Pay of Employees

San Francisco, Nov. 10.—It was announced here yesterday that 800 employees in the mechanical division of the bay district would receive an increase of two cents per hour. The increase will total \$37,000, according to the statement.

Armistice Day Quiet Few Stores Close

The banks and city offices were about all the business places that closed their doors Armistice day, although it was advertised that there would be a general closing. The merchants are beginning to think that holidays are becoming too numerous.

Wharf Lease

The referendum on the wharf lease is causing some adverse criticism for Richmond. The development of our waterfront can be checked temporarily only.

Richmond to Have Foghorn at Point

The city council has instructed Manager McVittie to proceed with negotiations for a siren to warn vessels entering the harbor during the fog periods.

There will be two sirens installed at Point Potrero, the cost to be about \$140 each.

S. P. Holdup Bandit Not Discovered

The mystery surrounding the holdup of the S. P. station ticket agent Monday night has not been cleared up. Lavo, the ticket agent, laid off a night or two after the "stickup," to rest his nerves, after having a gat poked in his ribs, with a nervous finger on the trigger.

An old fashioned dance is being planned by Richmond Odd Fellows and Rebekahs Thanksgiving.

Congressman Chas. F. Curry Recovers

Sacramento, Nov. 10.—Congressman Chas. F. Curry has entirely recovered from an attack of influenza, and left for Washington Wednesday. He was accompanied by members of his family and his secretary.

Sciots Organize Band

Richmond's Sciots band organized Wednesday night at the builders' exchange. Adolph Nelson of Alameda, director. The band is starting with 25 pieces, and expect to have 40 members in the near future.

CITY BRIEFS

Property owners at 39th and Barrett have asked the city council for a street light.

The Odd Fellows will advertise also. Ten-foot electric letters will adorn the sky line of the 10th street temple.

P. O. Rupp is now manager of the Contra Costa Finance & Loan Co., succeeding Jos. L. Reed, resigned.

Henry H. Uhlman's home in El Cerrito was damaged by fire to the extent of \$500 Monday. The house was nearing completion. Children playing in the building are believed to have started the fire.

East Richmond Asks For Things

The eastside improvement club of Richmond is in need of modern conveniences and is going after them. They want the following:

A postoffice and street car service; would take a bus line in lieu of nothing.

Want more light. Also a clubhouse for meetings.

And listen—they want a hospital. They expect to make their voting power felt, owing to rapid development.

Two inches of rain would scatter some of the near flu microbes and stimulate the Thanksgiving feeling.

Richmond Natatorium Asset to City

Richmond made no mistake when she erected the fine swimming baths which attract lovers of aquatic sport from the bay region.

The receipts have averaged approximately \$5000 per month since the doors were opened several months ago. In a few years, at the average rate of attendance, the swimming plant will have paid out the cost of construction, about \$120,000.

Richmond is proud of her swimming utility, owned and conducted by the city, and made to pay dividends on the investment.

Two Men Injured

Two men were injured Wednesday night at the Santa Fe Y and Macdonald avenue, when a switch engine ran into their automobile. They were treated at a local hospital.

Many Richmond residents attended the exercises in S. F. yesterday, when the five million dollar memorial buildings were dedicated.

Have it printed at The Terminal.

Shirley Races After Crook; Bullets Fly

Capt. B. V. Shirley chased a bogus check artist on Cutting boulevard Saturday afternoon and engaged in a gun duel with the crook, which was getting exciting and dangerous, when one of the crook's bullets grazed Shirley's clothing.

The check artist turned his car quickly on Second street, and beat it north into Macdonald and was lost in the traffic. Capt. Shirley, failing to turn his heavy car, went on to Third and then north into a blind street, which delayed him in the chase, his man getting a lead.

Richmond has daring policemen, and crooks have a small chance to get away; but this fellow knew the ropes—that the turn on Second was his only chance.

Department Report

According to figures submitted to the city council Monday night by Chief of Police Dan Cox, there were 108 arrests in October. Property reported stolen amounted to \$1164.80; amount recovered and returned to owners, \$1000.

The Horn's Triumvirate

These three men, known wherever horns are played, were among the musical folk who gathered in Elkhart, Ind., recently for the annual "music feast" of the Conn Music Center, to discuss the value of instrumental music in the training of boys and girls. At the right is Bohumir Kryl, world-famous cornet virtuoso and leader of the band bearing his name. In the center is C. D. Greenleaf, president of the National Association of Band Instrument Manufacturers, and at the left is Frederick Noel Innes, foremost trombone virtuoso of the eighties and nineties and leader of the famous Innes band. Mr. Innes is now head of the Conn National School of Music in Chicago.

FAMILY BAND

Those who are laboring under the delusion that the present generation alone is responsible for the Jazz Age would do well to study this picture, says the Conn Music Center, Elkhart, Ind.

Here five generations are pictured in harmony. It shows Mrs. Sarah Jane Hewitt of Los Angeles, eighty-six years of age, drawing harmony from one saxophone, while two more and a clarinet are held in reserve.

Her "little boy" Frank, a mere lad of sixty-seven, is playing the cornet. Her granddaughter, Mrs. A. G. Wagner, forty-one, holds still another saxophone while her great-granddaughter, Mrs. J. Edinger, Jr., twenty, is playing second cornet. Great-grandson Jack Edinger, Jr., is doing his best with the drums.

Needless to say, there are no dull moments in the home of the Hewitt-Edinger clan.

FIND YOUTH IS "HORNING" WAY AROUND WORLD

"Horning one's way around the world," is rapidly becoming a popular means by which Young America is gratifying its "going abroad" hunger, according to information reaching the Conn Music Center, Elkhart, Ind. Music is not only the where-withal which makes it possible for him to satisfy his desire for travel, but it is also keeping his pockets rather well lined.

The American band is found aboard the ships of every flag, and in the capitals of the nations of the Orient and Occident. Members of orchestras provide music aboard boat at comfortable salaries and further increase their earnings through concerts in foreign ports. The story of America's symphonic jazz has penetrated every nation, and the natives are waiting to try their luck with America's dance steps, too.

Even the American girls are "horning in" on this free but de luxe travel scheme. When Jack Sutherland returned to the United States recently his saxophone sextette included four American girls. They had stopped in Honolulu for their first appearance, then jumped to Japan. From there they kept on going, and playing.

"We were treated like ambassadors," reported Jesse Wright and his fellow members of the S. S. Franconia orchestra, when they docked at San Francisco after circling the globe on one of their tours.

THE TERMINAL is on file in all the public libraries in Contra Costa county and has hundreds of readers.

Memorial Bandstand Dedicated

The \$10,000 bandstand which was built by Contractor Wallace Snelgrove south of the Memorial building in the attractive park, was dedicated yesterday, the legal holiday commemorating the close of the world war—Armistice Day. The dedication services were held under the auspices of the Richmond Post of Veterans of the American Legion.

Gas Restrictions

The cleaners and dyers of Richmond are to comply with the fire hazard ordinance, the storage of gasoline and its use in cleaning. Fire Chief Cooper insists on enforcing the ordinance, which is not strictly lived up to, it is claimed.

Zeb Knott Is Still Smiling

Supervisor Zeb Knott, who ran to succeed himself in the recent November election, is still smiling. In completing the official count, it was discovered that Zeb ran ahead of any of the field of county officers, although his vote was confined to his own supervisorial district. This is quite a feather for Zeb, who modestly accepts the honors, and thanks his many supporters.

Improved Vacuum Tube

A new vacuum tube for radio receiving sets has been invented in France having two filaments. One is used at a time, but when a filament burns out the tube is so constructed that the other tube can be "cut in" on the "A" battery circuit, and the set continues to operate.

Postal Service Man Returns From Capital

(Albany Argus)

C. T. Frisvold of Stannage ave., has returned from Washington, D. C., where he attended a conference called for the purpose of drafting legislation and outlining improvements for the postal service.

The conference consisted of nine men called from different parts of the country, Frisvold being the only one from the Pacific coast. They were in conference with the Postmaster General and the First Assistant Postmaster General. They also called at the White House, where they were granted an interview with President Coolidge.

In addition to attending the business sessions of the conference, Frisvold visited many places of historical interest in and around Washington.

Annual Membership Meeting of C. C.

The annual membership meeting of Richmond Chamber of Commerce will be held at Hotel Carquinez November 17. The program is to be one of the best, and is being prepared by E. B. Bull, chairman of the committee.

The speaker of the evening has not been named, but will be a big "business man" it has been announced. Reservations for the dinner should be made early.

Garfinkle Funeral

The funeral of Mrs. Minnie Garfinkle, wife of Louis Garfinkle, Richmond merchant, was held Tuesday in San Francisco. Besides her husband, Louis, she leaves three children, Miss Bernice Garfinkle, Mrs. Florence Marcus and Nathan Garfinkle, and her mother, Mrs. Hulda Davis of San Francisco. Interment was made in Salem cemetery.

Signs Point to Warm Democratic Contest

Albany Merchants Ball Team Win From Martinez

Albany..... 2 1 2 0 0 0 1 0—6
Martinez... 1 0 0 0 0 0 0 0—1
In the Martinez All-Stars vs. Albany Merchants baseball game at Albany Sunday, the All-Stars started out fine, scoring one run in the first inning, and that ended their scoring in the contest for the leadership of the first half of the Broderick winter league season.

Martinez relieved their southpaw pitcher in the first half of the third, for the Albany kids had his number and were slamming him all over the field, while Martinez was booting the pill and throwing it away at critical times, helping Albany to pad their total score list.

A large crowd was in attendance, and much enthusiasm and interest was shown in the contest, which at times was exciting.

Pittsburg to Build High School

Pittsburg, Nov. 12.—Purchase of a 20-acre site for a new high school here was authorized at a recent mass meeting. Grounds totaling in cost \$30,000 are included in the proposed purchase.

Funds are now available by the district for buying fifteen acres of the tract, and the board of high school trustees proposed to float a bond issue of \$225,000 to purchase the remainder of the land and build the school.

Activity in community progress clubs is increasing with taxes both need adjusting.

McAdoo and Smith Are Dry and Wet Candidates

Washington, November 11.—Unless all signs fail the nation within a few months will witness the opening gun in a democratic battle which promises to be fully as severe as the one in 1924. As was the case two years ago, the leading opponents are to be Wm. Gibbs McAdoo of California and Gov. Al Smith of New York.

In the east Smith is strongly entrenched in the party councils but in the west and south there is a different story. McAdoo's ambitions form one of the big issues in the California field, and President Wilson's son-in-law wants to keep control of the dry and so-called progressive wing of the democratic party.

While McAdoo took an active part in the recent wet and dry contest and helped to roll up the substantial Southern California dry majority sustaining prohibition and the Weight act, he is silent on national issues.

It will not be long, however, until the campaign will begin to open up, and McAdoo will no doubt have some messages of national importance to deliver.

The split of the democrats on the wet and dry issue looms. A battle between Smith and McAdoo might well shake the very foundation of the democracy. The far-sighted leaders of the party will do what they can to avoid it.

Since Election

One can almost tell at the first glance whether his mail is of any importance or not.

THE THINGS WE DEPEND UPON MOST WE APPRECIATE LEAST

- 5¢ worth of ELECTRICITY
- WHAT A WONDERFUL NICKEL'S WORTH IT IS
- 5¢ spent for electricity will run a washing machine over 3 hours.
 - 5¢ spent for electricity will make a hot kitchen comfortable with an electric fan for over 11 hours.
 - 5¢ spent for electricity will run a sewing machine for 17 hours.
 - 5¢ spent for electricity will keep the refrigerator cold for over 11 hours.
 - 5¢ spent for electricity will run a vacuum cleaner for over 7 hours.
 - 5¢ spent for electricity will light your reading lamp for 4 long evenings.

Since 1913 the cost of living increased 65% while the cost of electricity DECREASED.

minutes
TO ANY MARKET

LAMB was at a premium. A California buyer learned that a large number of lambs were available in Ogden, Utah. Experienced in such emergencies, he used Long Distance Telephone Service and in five minutes purchased ten thousand head for immediate shipment. The saving in expense was real, but the saving in time was more important.

Whether buying or selling your market is only minutes away when you use Long Distance Telephone Service.

Many new uses of Long Distance are no doubt applicable to your business. These will be cheerfully discussed with you upon request to the Business Office of the Telephone Company.

If Kidneys Act Bad Take Salts

Says Backache Often Means You Have Not Been Drinking Enough Water

When you wake up with backache and dull misery in the kidney region it may mean that you have been eating foods which create acids, says a well-known authority. An excess of such acids overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and clogged. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels, removing all the body's urinous waste, else you have backache, sick headache, dizzy spells, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Wither consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink. Drink lots of soft water.

Explaining It

"Frederic, we must do something to remedy de status quo," said a negro preacher to his congregation. "Bruder Jones, what am de status quo?" asked a member. "Dat, my brudder," replied the preacher, "am de Latin for de mess we're in."—The Outlook.

It's a wise woman who knows half that she would like to know about her neighbors.

1/2 PRICE INTRODUCTORY OFFER TO DIABETICS
Money Back if Not Satisfied

Raymond Smith says:—

"Now No Doctor Can Find Diabetes In My System!"

"Three years ago I was rejected by my life insurance Co. because my blood sugar test was 200—I had the best medical treatment known, who help? When a friend who was cured of Diabetes brought me the first box that helped him.

This Herb Tea was the result of a

Lifetime Study by European Chemist, Pauling, in Europe.

"Instant effect in my case—improvement noticeable in 1 week—big improvement in a month—my blood sugar down to 90 and in the picture of health!"

"Gerry Diabetic should start right away to drink morning and evening—"

DIAGRAM NO. 11 TROPICAL HERB TEA FOR DIABETES

"Have a Blood Test and Urine Test Now—drink the Tea twice a day for 10 days—then have a new Blood and Urine Test and—Just Notice the Big Improvement! No Alcohol—No Drugs"

Coughs and Colds
are not only annoying, but dangerous. If not attended to at once they may develop into serious illness.

Boschee's Syrup

CALIFORNIA NEWS BRIEFS

Completion of the new long-distance telephone cable of the Pacific Telephone and Telegraph company between the San Francisco Bay area and Sacramento was celebrated recently when the last splice in the big cable was made at Cordelia. Company and public officials participated in the exercises. Approximately \$2,500,000 has been spent on the new line, which is 90 miles long and carries 275 talking lines between the Bay area and Crockett and 135 talking lines through to Sacramento. Enough wire to circle the earth one and one-half times is contained in this cable, which weighs about 2,000 tons and is supported upon 2,000 poles.

Despite the generally held theory that Chinese are extensive users of narcotic drugs, the state narcotic report, which will be submitted to the Legislature this winter, indicates that Americans and Mexicans constitute by far the largest percentage of "dope" addicts in California. A survey of narcotic law convictions over a period of six months in Los Angeles disclosed that 38.4 per cent of total violators were Mexicans and that 27.5 per cent were white Americans. For the same period 18 per cent were found to be American negroes, while the Chinese totaled only 13 per cent. Other nationalities made up a balance of 3 per cent.

In a rude bear trap made of logs Harry A. Cleland and James A. Cleland, Shingletown, Shasta county, caught about the biggest bear ever seen in the mountains in this region. The bear weighed 600 pounds. It took four men to load it into a truck. The animal was a brown bear. He was ferocious while a captive in the log trap. Two by six scantlings were spiked to the trap door with sixty penny nails. The bear was ripping off these scantlings when he was discovered and shot to death in the trap of logs.

There is under construction at the college of agriculture, Davis, a new type of earth building known as "pico-de-terra," or rammed earth. This building material is centuries old, having been used in many countries. However, due to the abundance of other building materials it has never been very popular in this country. There are, though, a few buildings especially on the Atlantic Coast where this type of construction was used.

H. Dana Bowers, in charge of the grounds at the University Farm at Davis, says there is a very simple and speedy method of establishing a lawn on terrace and slopes. This has always been a difficult problem, due to the fact that it is hard to keep the seed in one place long enough for it to take root. However, in place of seeding, or using sod, the sack or burlap method of establishing the lawn is both quicker and easier.

Minute observations intended to more definitely establish if possible a relationship between the great redwoods of the coast country and the "big trees" of the Sequoia National Park are now being made in Sequoia Park by Major Mason, conservation forester of Oregon and member of the Save-the-Redwoods League. Superintendent John R. White of the national park has accompanied the expert to the Garfield grove.

Dick Ostendorf, manager of the Chew Muck place near Terra Bella, expects a much larger crop than that of last season. He anticipates from 20,000 to 30,000 boxes of navela from 115 acres and perhaps 30,000 boxes of Valencia from eighty-five acres. A large quantity of fertilizer has been used during the year and Ostendorf is planning to spend \$15,000 for barnyard and commercial fertilizer for immediate use.

Plans have been prepared for a four-story hotel and hall building to be built at San Pedro, for the Salvation Army. The structure, estimated to cost \$75,000, will be of brick construction with pressed brick exterior facing. The first floor will be given over to a large assembly hall, a reading room and several offices, and the upper floors will contain sixty hotel rooms.

Los Angeles county has 71.90 per cent of the population of the ten southern counties and 35.35 per cent of the total population of the state. Los Angeles and Orange counties have 40.39 per cent of the state's population while the nine San Francisco Bay counties have 28.04 per cent according to a report just released.

Work on what is to be the highest dam in the world is now actually under way at the forks on the San Gabriel River about eleven miles northwesterly from Azusa. It will cost about \$25,000,000. It will be 492 feet in height and its span will cover a distance of 2,500 feet. It will impound 240,000 acre-feet of water, creating a lake about ten miles long.

President of the Board of Fire Commissioners G. W. Van Biber, Petaluma, at the meeting of the board was requested to ask the City Council to amend the city ordinance prohibiting use or maintenance of gasoline heaters or gasoline burners inside any building, tent or shelter in that city. The city of Stockton, San Joaquin county, has selected a site for its municipal airport. It is located five miles south of Stockton, comprising 140 acres. More than \$10,000 will be expended to improve laying approximately one-half mile of spur to form railroad connection.

Redlands' October building permits broke the record for the year when they climbed above the \$200,000 mark. A chapel to cost \$10,000 is being constructed at Alhambra in connection with the Episcopal Home for the Aged.

A new church costing \$35,000, to be the most imposing house of worship in Martinez, is planned by the members of the Congregational church. Contracts have been let for improvements at the San Joaquin county hospital to cost \$160,000. An annex to house employees and nurses will cost \$150,000.

The Berkeley Teachers' Association announced endorsement of the \$2,942,000 emergency school bond issue which is to be voted upon at a special election on December 11.

Building permits in Los Angeles show a substantial gain in October over September. The October report of valuations is \$9,340,504. September building totaled \$8,045,606.

Construction work has just been started in Oxnard on a one-story \$125,000 bank building which is destined to be one of the finest small structures in the Oxnard vicinity.

Products of California are in greater evidence than ever before in the principal eastern cities, particularly in New York where the main docks are full of California fruits and manufactures.

"All wool and state-wide" was the slogan of a big gathering in San Francisco on November 5th and 6th, when 300 sheepmen from all parts of California assembled for their nineteenth annual convention.

The bank clearings for October reported by the Sacramento Clearing House Association, were \$37,458,411.87. This figure represents a decrease for October last year, when the clearings were \$42,893,345.16.

Contract to build a one-story addition to the girls' gymnasium building of the Ventura Union High School at Ventura has just been awarded Los Angeles. Plans reveal that the addition will cost \$21,592.

Dr. Guy L. Hunt of Santa Rosa, has been appointed medical director of the Yosemite valley. Announcement is made that the government intends to erect a large modern hospital in the Yosemite, which Dr. Hunt will direct.

The new physics and chemistry building of the Roseville High School is being built by the students in the vocational class of the school. It will contain both laboratory and lecture rooms and will be of concrete construction.

Financial problems, with special attention to farm credits, were discussed by 250 bankers of northern and central California counties who gathered at Sacramento in a meeting of group No. 1, California Bankers Association.

Gilbert Lee Barham, or "Gillie" Barham as he was familiarly known in Chico for the last half a century, who died in a Woodland hospital a short time ago, established the first telephone exchange in Chico thirty-four years ago.

All the members of the Ojai chick raising club of boys at Ventura attended the annual convention of boys' and girls' agricultural clubs at Davis in October. They returned, inspired by their visit to the State Agricultural Farm and say they expect to make greater progress during the coming year.

John S. Taylor, now Santa Rosa's oldest citizen at 98, went to the polls to vote for candidates and amendments. This has become something of a habit with Taylor. He has gone to the polls without missing an election of any kind at a general, state, county, city, school district or township for 76 years.

Shortage of cotton pickers remains an acute condition in Merced county, despite the efficacious results of the marshaling of laborers by the Agricultural Labor Bureau of the San Joaquin valley, said A. R. Linn, manager of the Merced County Chamber of Commerce and a director of the valley-wide organization.

The "mother of all orange trees," the oldest living bearer of the golden fruit, will be dedicated at Oroville to the pioneers of California Saturday afternoon, November 27, as the concluding feature of the California's Orange and Olive Exposition, to be held at Oroville Thanksgiving week, November 23 to 27.

The sum of \$40,000 has been allotted by the state for construction of a highway approach to the Bolinas pier of the Vallejo bridge across Carquinez Strait. Work on the road is expected to start soon, as all surveys and estimates have been approved. The work will be under the direction of the recently organized Solano-Napa County Road District.

One of the scarcest things to be found in a state penitentiary is a fat criminal. Making this claim B. B. Meek of Oroville, former member of the State Board of Prison Directors, declared that during his eight years as one of state parole agency he observed over 4,000 convicts at Folsom and San Quentin prisons and saw only one actual fat man among them.

Scientific information gained during the World War is being used at Turlock, in an experiment in the extermination of noxious weeds. Master Sergeant F. M. Nash of the chemical warfare service is trying out chlorine gas as a means of eradicating Japanese holcrops or "blue weed." Holes twenty inches deep are drilled in the ground and blown. Chlorine gas is then introduced into the shaken lower levels by means of a hose. By next year it will be possible to determine whether or not the deep roots of the weed have been killed.

EL SALVADOR

Industrious Country Women of Salvador.

(Prepared by the National Geographic Society, Washington, D. C.)

SALVADOR, the only Central American member of the newly elected League of Nations council, is the smallest American republic.

El Salvador, as the people themselves call their volcano-girded, forest-fringed country, lies on the west coast of Central America, a week's sail by coastwise steamer north from Panama.

It is the only country between Canada and Colombia without an Atlantic as well as a Pacific seaboard. It has the densest rural population on the mainland of the Americas, with 1,400,000 people occupying an area no larger than the state of New Jersey.

Sailing along the Salvador coast, one's first characteristic view of the country is likely to include the volcano Isalco; and not unlikely it will be seen in eruption, for it sends out flows almost as regularly as the Old Faithful geyser of Yellowstone park sends out steam and water.

Seafaring men called Isalco "The Lighthouse of Salvador." To the Salvadorians this active volcano was known formerly as "The Safety Valve." They believed that its daily eruption assured their deliverance from severe earthquake and devastating lava flow. Then came the fateful day when Isalco ceased erupting, followed by those terrible earthquakes which in part demolished the capital, while another, heretofore dormant, volcano in a densely populated district, rocketed forth a living stream of fire, which completely destroyed towns and fincas (estates), and for miles around covered that season's coffee crop with a fine lava dust.

If one enters Salvador through Acajutla, he will disembark in an open roadstead a mile out at sea and go ashore in a launch. From this he must be hoisted to the pier by a crane in a swinging chair.

A visit to a country estate in the near-by hills of the balsam coast is a most delightful experience. The house of such an estate will probably be set in a magnificent forest of giant balsam trees, whose trunks bear scars made by a pre-Columbian people, who tapped them then for the scented balsam in much the same method employed today.

Balsam and Coffee.

The balsam tree, one of the most beautiful of the tropical forest, is cousin to the acacia. It grows rather isolated from its neighbors, even from its kind, its graceful branches high above the ground. Native to the west coast of Central America, it has been exploited only in Salvador, where it grows in a limited area of 750 square miles. It has of late years been introduced into Ceylon.

The method of the balsam tappers is primitive. Although the tree holds sap all year round, the tapping takes place only in the dry season. The outer bark is first cut with a blunt instrument, leaving the inner bark exposed. The flow of sap being stimulated by the application of a burning torch.

After several days the sap exudes slowly, but steadily. Cloths attached to the wounds, having become impregnated with the balsam, are collected, thrown into boiling water, and subjected to heavy pressure. The crude balsam settles at the bottom and the water is then poured off.

The balsam, later clarified through the evaporation of impurities, is packed in metal cases for shipment to Europe and America, where it is used for medicinal purposes and as a basis for perfume. Every morning at such an estate a servant walks through the house waving a burning balsam branch. One lives in an atmosphere deliciously perfumed with the odor of the coffee tree, however, with its creamy flower and rosy berry, rather than the rare balsam, lay the wealth of the planters. A few seasons ago Salvador's coffee output totaled 75,000,000 pounds. It goes mostly to France and the United States.

The Salvadorians should erect a monument to the Brazilian school teacher who, in 1840, brought the coffee tree there from his own country. The day he planted that first coffee tree in his garden he laid the cornerstone of Salvadorian prosperity.

The Salvadorian aristocracy is of Spanish and other European blood, many Britishers, Frenchmen, Belgians,

Italians and Germans, having married into the old Spanish-Colonial families; but the masses are of Amerind stock, with a Spanish admixture—that stock we loosely call Indian. Salvador boasts of having very little African blood.

Often on the highway one meets a bronzed man or woman with those pronounced features and unique profile typical of the ancient Maya people whose temples, in jungle-clad ruin, are strewn from Honduras to Yucatan. Such place names as Chalatenango, Cuscatlan, Usulutlan, and their like hark back to the shadowy past.

In the evening guests at country houses sit with their hosts under a brilliant canopy of stars, listening to alluring Spanish songs with guitar accompaniment and sometimes a serenade by the marimba players.

Life in the Country.

Most of the people live in the healthful uplands, the volcanic region. San Miguel, one of the highest of these volcanoes, has an altitude of 7,000 feet. Nearly the entire country is suitable for cultivation, the soil, consisting mainly of decomposed lava, being exceedingly fertile. This, and the fact that the majority of the people are land holders, accounts for the teeming population, the industry and contentment to be noted everywhere.

One of the oldest of the products, long the chief export of the country, is indigo. This native plant (liquilite) supplied the dye of the ancient inhabitants. Sugar now ranks as an important export. In the days of the forty-niners, the greater part of the rum consumed by the California miners came from Salvador. Rice, like sugar, was brought from the Old world; but cacao, corn and tobacco, are indigenous. Turkeys are kept in flocks in the tobacco fields to devour the worms and insects on the tender leaves of the plants.

Corn and beans are the staple articles of diet among the poorer classes. Corn cakes (tortillas), sturdy cousins of our hot cakes, form the plate on which the frijoles are heaped.

Coffee is prepared in the form of a strong extract, a teaspoonful or two being added to a cupful of hot milk. Among tropical fruits is the delicious nispero, the fruit of the tree Achras sapota which supplies the sap known commercially as chicle, the basis of chewing gum.

In the cattle country cattle are not only abundant, but seem to thrive with little or no attention. Beef is moderate in price. As in all tropical countries, meat must here be cooked and eaten the day the animal is killed.

Gold and silver rank high among Salvador's products. Up-to-date methods in gold mining were introduced twenty-five years ago, when an energetic American engineer obtained a property of high-grade ore and installed, with British capital, a most complete equipment. Later, acquiring a large tract of low-grade ore, he agreed to permit government students to complete their studies in mining and metallurgy at his properties.

In the Capital City. San Salvador, the capital, with 75,000 inhabitants, is connected with the port of Acajutla by an English railway. It lies 65 miles inland and a little over 2,000 feet above the sea. The railroad crosses the territory devastated by the 1917 lava flow from the volcano, San Salvador.

The capital, even in the shadow of its smoking namesake, was quickly rebuilt. Although founded in 1525, it has quite a modern air. While one-story structures predominate, there are a number of splendid government and municipal buildings of reinforced concrete and several fine parks. Because of tragic lessons of the past, the cathedral is constructed of wood painted to resemble stone.

The main market overflows into the surrounding streets. Besides the native merchants, Chinese, Turks and Armenians are in evidence. Delicacies in the food-line, unfamiliar to us, are fresh-water shrimps, the size of small lobsters, tortoles, eggs, and snails.

City property pays a tax, but rural property pays nothing to the state and only a small sum to the municipalities. The main income of the state comes from the export and import duties, the exports exceeding the imports.

CENSUS REVEALS ASTONISHING FACT

8,549,511 Working Women in United States

MRS. W. M. BAILEY
R. F. D. No. 5, Box 27, Atlanta, Georgia

Many Say Lydia E. Pinkham's Vegetable Compound Helps Keep Them Fit to Work

8,549,511 women would be a vast army. According to the 1920 Census of Manufactures, that is the number of women and girls employed in all trades in the United States. Napoleon said, "An army travels on its stomach." This army of women travels on its general health. Every working girl knows that time lost through illness seldom is paid for and seldom can be made up. Employers demand regularity. If she

wants to keep her job or hopes for a better one, she must guard her health.

Atlanta, Ga.—"My system was weak and run-down, and I was tired. I was this way for five years. One more, I read your advertisement in the papers and I decided to try your medicine, the Vegetable Compound, but I did not begin to take it regularly until after I was married. I got so much good from it that I feel fine and have gained in weight. I work in a broom shop, but my work is not so hard on me now, and I keep my own house, and work my garden, too. I am telling all my friends of Lydia E. Pinkham's Vegetable Compound and how it has helped me."—Mrs. W. M. BAILEY, R. F. D. No. 5, Box 27, Atlanta, Georgia.

Missouri Woman Helped

Parkville, Mo.—"I am proud to recommend Lydia E. Pinkham's Vegetable Compound. I was so ill that I could not lie down at night. Then I got my husband to go to the store and buy me a bottle of Lydia E. Pinkham's Vegetable Compound and I was up and around before the first bottle was gone, although I only weighed about ninety pounds. I took six or eight bottles and was able to do all my housework, washing and ironing, care of my five boys, and tend to my chickens and garden, where before I had to hire my washing and part of my housework."—Mrs. ANNA COLE, R. R. 2, Parkville, Missouri.

Good Works

Alonso Potter, president of the Big Brother movement, preached in New York a religion of good works as against a merely passive religion.

"Why, my friends," he cried, "there is almost as much difference between being good and doing good as there is between being a man and doing a man."—Minneapolis News.

Seth—Why, he loafs all day. Never sees it for anything.—Alliston Recorder.

Keep Fit!

Good Health Requires Good Elimination.

TO be well, you must keep the blood stream free from impurities. If the kidneys lag, allowing body poisons to accumulate, a toxic condition is created. One is apt to feel dull, languid, tired and aching. A nagging backache is sometimes a symptom, with drowsy headaches and dizzy spells. That the kidneys are not functioning properly is often shown by burning or scanty passage of secretions. If you have reason to suspect impure kidney functioning, try Doan's Pills—a tested stimulant diuretic. Users praise them throughout the United States. Ask your neighbor!

DOAN'S PILLS 60c

TINY DIATOMS HOLD SECRET OF SEA LIFE

Study Plants No Bigger Than Grain of Dust.

Washington.—Millions of plants no larger than a grain of finest dust and invisible to the naked eye have been brought to the Smithsonian Institution by Dr. Albert Mann, custodian of diatoms of the National museum, as a result of summer field work at Wood's Hole, Mass., and at the Carnegie Marine Biological laboratory on the Florida keys.

These diatoms are the grass of the sea. They transform within themselves inorganic matter into food material for the smaller animal life of the sea, which in turn forms the food of other larger animals and finally man. Therefore, in spite of their microscopic size, their importance is immense. Doctor Mann illustrates this very graphically in the case of a young hake whose stomach contents he once examined. The hake was filled with very small herring, these in turn were gorged with copepods or water fleas and the copepods were full of diatoms.

Backed by Carnegie institutions. So great is the economic importance of these microscopic creatures that the Carnegie institution began to support Doctor Mann's work on them ten years ago, and he is now co-operating with the United States bureau of fisheries, the Canadian fish commission and the national research council.

Diatoms exist all over the earth, in salt water, fresh and brackish water. About 8,000 different kinds have already been described and this figure is steadily growing. What the diatoms lack in size they make up in numbers, some water containing as many as 35,000 of them to a quart. Doctor Mann's program involves a survey of living diatoms on the American seaboard and in its inland waters; a representative collection of these and of all fossil diatom earths so far discovered. In this way he is building up in the Smithsonian institution a diatom collection of practical usefulness which will have no peer. With the aid of this basic material such practical problems as maintaining the diatom food supply for the support of food fishes can be better understood and investigated.

Require delicate instruments. Mounting specimens of such minute plants requires the most delicate instruments and touch. Doctor Mann has developed a glass needle attachment to a microscope with which he can pick up, turn over and otherwise arrange the infinitesimal diatom. This permits him to mount a single specimen on a slide.

Under the microscope the diatom is seen to be one of the most intricately formed and beautiful objects in nature, following every conceivable geometric pattern. Each little cell builds for itself a case of silica, which is capable of enduring for millions of years. This quality has produced results of great economic importance, for during past ages these shells have been laid down on ocean floors in immense deposits which in turn have been raised as the result of geological convulsions and are now available to man. They occur in all lands. At Lompoc, Calif., is a huge deposit of fossil diatoms covering an area of 12 square miles and 1,400 feet thick.

This diatomaceous earth is mined and used as a polish, is combined with nitroglycerin to make dynamite and as a filter for certain serums and especially for thick liquids like sirups, oils and varnishes. It has even been used as an adulterant for cheap candy and also as a base for tooth paste. Finally the diatom is the standard test for microscopes and microscopic investigations.

RADIO INVENTOR

An amazing radio development, named as the one evolution of naval communications which will put the United States navy above any danger of enemy interference with its signals and which may prove of wide value in commerce, was announced by Maj. Francis H. Pierce, radio officer of the United States marine corps. Complete and conclusive tests have demonstrated that the invention of Major Pierce is capable of transmitting radio signals in such a manner that they can be received over intervening objects between the sender and receiver of the signal.

FRENCH PORTERS ROB TOURISTS

Charges for Service Said to Be Excessive.

Paris.—One hundred francs for carrying two suitcases from the customs shed at Cherbourg to the tender, a trip of less than 100 yards, is charged by porters.

The imposition has caused the foreign steamship companies to take drastic steps against it. The union of baggage porters appears to have singled out Americans for its holdup tactics. In some instances passengers, especially unescorted women, have been literally robbed.

One American woman recently embarking on one of the ships flying the American flag gave the porter 40 francs. He demanded that she open her bag and produce more money. Terrorized, the woman unclasped her handbag and showed the porter one 20-franc note, all the French money she had left.

"This will have to do," said the holdup man, snapping the bill away. The woman shrieked, and one of the officials came along and made the porter disgorge but not without a short, spirited fight.

These instances, which had multiplied by hundreds recently, caused the skipper of an American ship to send for the walking delegate of the porters' union and warn him that if such sharp practice did not cease he would call upon his crew to handle the baggage and give them instructions to give a forced bath to any porter interfering.

"They never come back, these people," said the walking boss. "I don't see why we shouldn't get all we can out of them."

Wood of Palmetto Tree Now Used for Furniture

Atlanta, Ga.—The sable palmetto tree, emblematic of the state of South Carolina, is about to attain its second place in the history of the United States. This time it will be chronicled in the annals of furniture manufacturing.

The tree received first historical mention as a protection for the American colonists in their defense of Fort Moutrie, where the shot from the British fleet sank harmlessly in the soft, spongy logs.

His attention prompted by the unique porous quality of the tree, a large industrialist acquired a 300,000-acre tract of groves and enlisted the aid of 12 laboratories of furniture companies in an attempt to apply a veneer finish.

The work was assigned to the woodwork department of the Georgia School of Technology, which, after a two-year period of research, has just succeeded in applying a glasslike veneered surface.

Its only use in the past has been for dog piling and the building of rugged, picturesque log cabins.

Eggless Custard Sale

Cost Him \$10 Fine

Brookton, Mass.—Judge Carroll C. King had a busy day in district court here with cases that resulted from the Brookton fair. One case established itself as well out of the ordinary. It concerned one Lester Kohn, a concessionaire at the grounds. He was charged with "sale of custard containing no eggs." State Health Inspector Daniel G. McCarthy brought the charge, claiming that Kohn was doing a rushing business in selling custards, but he informed Judge King that a custard is not a custard without eggs. Kohn paid a \$10 fine and it is the first time in the history of the local court that a conviction has been made on such a charge.

Presidents, Popes Have Longest Lives

Washington.—What class of persons live the longest as an average? Occupants of the White House hold the record for longevity, according to statistics on notable men compiled by Pitrim Sorokin, a Russian economist. Their average life span is almost exactly the biblical three-score and ten.

Close on their heels as long-lived mortals are the popes of the Roman Catholic church, who average 69.4 years. A third group includes American millionaires, with 69.2 years. Scholars and scientists average 67.3 years and writing men 64.4 years.

The poorest showing was made by the hereditary monarchs of Europe. Though this group included some very long-lived families, the average longevity was only 53.6 years. In explanation of the poor showing of kings, it has been pointed out that other groups represent the results of selection. The presidency and the papacy, for example, are both elective offices and are filled invariably by men of mature years and usually good health, who have made their own records, while monarchs are not selected simply by accident of birth, and by the same accident of birth may come of stocks decidedly inferior so far as health and vigor are concerned.

A "balloon camera" also is being developed for some battle scenes. A gas bag 20 feet in circumference will have a carrying power of 80 pounds. It will hold a 60-pound camera suspended in a cradle and operated by two men, being held by handles and then released on signal to rise to a height of 100 feet, shooting down on the action for a scant 30 feet of film printing automatically.

ARCH DAM STANDS AGAINST ALL TESTS

Experimental Structure in High Sierra a Success.

New York.—The "arch dam," erected in a steep canyon of the Sierra near Fresno, Calif., to settle problems that have baffled engineers of all countries for centuries, has so far withstood every test, it is announced in New York by the Engineering Foundation, a committee of which is directing the project.

For many months the engineers have been building and testing this dam to a height of 60 feet and at a cost of \$110,000, contributed by more than fifty firms of bankers, manufacturers, engineers and power companies.

It is the purpose of the engineers to test the dam to destruction in the interest of science, but the structure's stamina in resisting the onslaughts of water that has been impounded will force them to build higher. The end may not come and with it an answer to their questions, until the dam has been built up to 100 feet at an additional outlay of \$30,000.

Much Work Still Ahead.

Many tests have been made, but they are still incomplete, according to the foundation's announcement, which said that months of work are still ahead. Thousands of records have been made, and are being studied, tabulated and graphed by the testing staff.

The dam, constructed of concrete, did not break at 60 feet, even when the reservoir back of it was filled so that water flowed over the top of the dam. The engineers will gradually increase the height of the dam until it finally gives way under the increasing pressure. It is planned first to extend the height of the dam ten feet, and then twenty, thirty or forty feet if necessary.

"While this is a unique example of the romantic side of engineering, it is, nevertheless, a straightforward endeavor to solve an everyday problem affecting engineers, bankers and the public," Director Alfred D. Flinn of the Engineering Foundation, 29 West Thirty-ninth street, said.

"The investigation is attacking important questions of engineering research in the application of scientific knowledge.

"A correct answer will tend to safety of lives, of millions of dollars in property and may make possible the construction of less costly dams for power development, irrigation of lands now useless, water supply of cities and towns and flood prevention.

"A less expensive type of dam than has heretofore been preferred by many engineers and governmental authorities would make possible some of the projects for water power and irrigation which are not now commercially feasible because of the handicap of expense.

"Successful financing and development of projects of this kind will add to the wealth of states, communities, and, in fact, the whole nation, as well as provide power, food and water for a larger population, and increase the basis of taxation, for the support of government.

Built to Height of Sixty Feet.

Early in April, after months of work, excavation in the granite side and bottom of the gorge for the foundation of the dam across Stevenson creek was completed. April 19 the first concrete was placed in the wooden forms, and on June 4 the last concrete had been laid to build the dam to a height of 60 feet.

The reservoir back of the dam can be filled not only from the water of the creek, which at times almost dries up, but from one of the great water supply tunnels of the hydroelectric plants of the Southern California Edison company, which pierces the mountain just above this reservoir.

Consequently, the engineers are able to fill and empty the reservoir back of the experimental dam in a short time, just as one fills and empties a hand basin through the faucets and the waste pipe. This permits experiments to be made at will under conditions of full control very much as if this huge "specimen" were in a laboratory.

New Kite and Balloon Camera Movies

San Antonio, Texas.—A "kite camera" operated by the pulling power of 100-foot centipede-type bamboo and paper kites has just been used successfully for the first time in making motion-picture long shots of troop movements at Camp Stanley, near here.

The camera, wound up with a spring, is set and released at a height of seven feet, trailing away all the time as it ascends; a kite string to a height of 1,000 feet. The camera weighs seven pounds and is carried by a butterfly contrivance with a trap, or catch of rubber bands. When it strikes the kite the catch breaks, the wings automatically fold, and the camera is carried back by its own weight to be released.

"A balloon camera" also is being developed for some battle scenes. A gas bag 20 feet in circumference will have a carrying power of 80 pounds. It will hold a 60-pound camera suspended in a cradle and operated by two men, being held by handles and then released on signal to rise to a height of 100 feet, shooting down on the action for a scant 30 feet of film printing automatically.

MOTHER WINS BABE HELD ON BOARD CLAIM

Court Gives Her Child and Permits Payment of Debt on Installments.

Fort Worth, Texas.—L. E. McCollum is much like other three-year-olds, except perhaps that he's quicker with his smiles and more generous with a certain, delightfully deep chuckle. He doesn't look like a tested property, but the state of Texas heard the pleas of two women, mother and foster-mother, each suing for the right to his smiles and tears.

Judge Bruce Young, acting on the writ of habeas corpus brought by the mother, took the baby out of the care of Mrs. Bertha Hunter and placed him in the custody of his aunt, Mrs. L. E. Ragdale. The young mother, Mrs. Effie McCollum, was given the right to see him at any hour of the day, but forbidden to take her son out of the county or take him away from the Ragdale home at night. The child was placed under the general supervision of C. E. Maker of the Juvenile court, who is to keep Judge Young informed of his welfare.

Mother Walks Out With Babe.

The mother walked from the courtroom with the little fellow's arms tight around her neck. From another door the sad-eyed woman who has had the care of the little baby since last November left the room, lonely and empty-armed. Her eyes were red from crying. L. E. McCollum had been her daily care for almost a year.

Mrs. McCollum, the mother, placed her baby boy in Mrs. Hunter's care with the understanding that she was

Wins Babe.

to pay his board, according to the story told Judge Young. Mrs. McCollum has been working in a cafe. It was impossible, she said, for her to care for the baby and work for a living at the same time. The child's father was last heard from in Marietta, Okla., where he went following a separation from his wife.

The baby's board bill, paid regularly for a time, became long overdue, according to Mrs. Hunter's claims. The sum amounted to \$130. Mrs. McCollum pleaded illness. Two weeks ago, when the mother sought to take the boy away from his boarding house, the foster mother protested, demanding the board money and proclaiming her own affection for the little fellow. The habeas corpus suit followed and the little boy left his foster home after an hour in the courtroom.

Lives With Widowed Daughter. Mrs. Ragdale, the aunt in whose custody the baby was left, lives with a widowed daughter and an orphan grandchild.

The young center of the dispute, joyous at an outing and at being with his mother, accepted his new life with no more comment than a hug. While the two women waged a legal battle for him, he smiled first at the judge, then at his mother.

Mrs. McCollum is to pay off her debt to the Hunter family in \$5 installments, according to the arrangements completed during the hearing.

Revolver Fails, Chokes Heroine to Save Play

London.—Michael Hogan had to do some very quick thinking recently to keep a performance of Dostoevski's "The Idiot" at the Little theater from going to pieces when the revolver with which he was supposed to kill the heroine failed to go off.

Improvising the line, "I can't do it," he threw the weapon away and choked the heroine to death so realistically that persons in the audience who are familiar with the play did not realize there was a hitch in action.

Miss Stella Arbenina, who was acting the role of the murdered heroine, got a bad fright. "Before I knew what was going on I found myself on my knees screaming and Mr. Hogan was clutching at my throat in a way that made me think he was mad. My throat is still sore, but it is wonderful that he was able to save the scene," she said.

Popular San Diego Woman Recovers From Long Illness

Amazing Improvement in Mrs. Jester's Health Surprises Friends. Serious Ailments Caused by Nervous Breakdown Relieved and Strength Restored by Tanlac. Looks and Feels Better Than Ever

"Tanlac has certainly done wonders for me; I cannot praise it enough," declares Mrs. T. D. Jester, 1288 Pennsylvania Avenue, San Diego, Calif. "I had suffered a nervous breakdown and for many months afterward I continued to get worse and worse, despite all the different nerve medicines I tried. Nothing seemed to help until I tried Tanlac. 'I was as near to being a complete nervous and physical wreck as I could be, without entirely collapsing. The slightest noise would make me want to scream, and after retiring it would be hours before I could sleep. I would awaken with terrible nervous headaches and the slightest exertion would tire me out so that I would be trembling. I lost weight and appetite. I tried Tanlac with little expectation of improvement. 'Before I had taken all of the first bottle, I developed a ravenous appetite, and was sleeping better. I continued to improve rapidly and felt like a different person entirely. In less than three weeks I had gained seven pounds! Later, my weight went up from 105 to 125 pounds. If your troubles are similar to those

from which Mrs. Jester suffered so keenly, get relief before it is too late! Tanlac will doubtless help you just as it helped Mrs. Jester—and as it has helped thousands of other sufferers. Tanlac is a pure and wholesome compound, made from herbs, roots and barks, according to the famous Tanlac formula. It is a wonderful tonic medicine, for run-down and nervous conditions and for digestive disorders. All good druggists sell Tanlac—get your first bottle today! Over 40 million bottles sold.

MELONES DAM COMPLETED

The Oakdale and South San Joaquin Irrigation Districts have erected a dam, 185 feet high and 590 feet wide. Water will be backed up for a distance of 12 miles forming a reservoir of 112,500-acre feet capacity. The water will be released through a tunnel, one mile long and thirteen feet in diameter to a power house with an installed

capacity of 36,000 horsepower, being erected by the Pacific Gas and Electric Company. A co-operative agreement between the power company and the farmers made this project possible. The initial expenditure is \$5,000,000. The dam was financed by a bond issue of \$2,200,000 voted by the districts. The company will

build the power house at a cost of \$2,500,000 and pay the farmers for the privilege of using their stored water as it passes through the power plant. The districts' bonds with interest will be retired by the power company payments in forty years, thus providing a great storage system and water for the farmers without cost.

How to Keep "Kids" Off Street

When the Dudson family of Vancouver, B. C., bought two cornets and a trombone for their three children—the eldest of whom was then but six—the neighbors viewed the musical project with decided skepticism. "Father" Dudson, however, had ideas of his own, and the doubts of the neighbors worried him not one iota. He believed that children "run the streets" because there is nothing in the average home to hold their interest. He believed that with a definite something in the home it would be the home, and not the streets, that would see the most of his children. Further, he believed that music could supply that definite something. At least it was worth a trial.

The above picture, from the Conn-Music Center files, goes far toward telling the rest of the story of this father's experiment.

His three children—Billy is now eight, Hector is six and Mona is four—are now real musicians. Recently they tried their instruments on a nationally known vaudeville circuit. "Just to see what it was like," critics pronounced their act the feature of the bill. "Father" Dudson, however, is more interested in the fact that the act is the feature of the home.

PROGRESSIVE RED CROSS CAMPAIGN FOR HEALTH

Public Health Nursing, Nutrition and Home Hygiene Work Cover the Country.

Important contributions to public health were made by the American Red Cross through its Public Health Nursing Service, Nutrition Service, and in instruction in Home Hygiene and Care of the Sick. In every State and Alaska, with the exception of Delaware and Nevada, instruction was given by the Red Cross, also in the Philippines, Hawaii, Porto Rico, and Virgin Islands. A total of 57,370 women and girls learned to make a hygienic home, and care for the sick in their homes.

The United States Public Health Service estimates that adequate rural health nursing service would cost \$20,000,000 annually, but would save a billion dollars in value of human life, earning power, and economic conservation. The American Red Cross, through its Public Health Nurses, of whom there were nearly 800 on duty the past year, is doing its part in meeting this requirement.

The Red Cross, through its nutrition service, taught thousands what to eat for health. This country, 24 States were served with from one to ten Red Cross Chaparr nutrition programs in each State. In 33 States, nutrition instruction was given either through the regular nutrition instructors or through volunteer dietitians.

During the school year an average of 15,413 individuals a month, including parents, teachers, pre-school, and school children, were assisted to a better knowledge of food in its relation to health, and how to apply it to their daily lives. In March, 111,219 individuals received this instruction, while during the year 3,588 classes were conducted and 6,450 conferences and home visits were given by nutritionists, thus reaching thousands of individuals.

The Annual Roll Call for Membership from November 11 to 25 is an invitation to all persons to assist in maintenance of such services through another year by enrolling in the American Red Cross.

Educators Give Junior Red Cross High Praise

Growing recognition by leading educators all over the world has been an achievement of the Junior Red Cross in the last fiscal year.

Included in those which have taken especially favorable cognizance of Junior Red Cross efforts are the World Federation of Education Associations at Edinburgh, Scotland, in 1925, the Department of Superintendence of the National Education Association, at Washington, 1926, and the National Education Association in Philadelphia, June, 1926. Various State educational bodies have confirmed this approval, the report adds.

As a phase of their work, the Juniors have developed contacts through exchange of correspondence, with similar Junior organizations in virtually every part of the world, and through the development of this medium many leaders see a better chance for world peace in future.

An especially notable development of Junior organization has occurred in Porto Rico, with an enrollment of 137,000, and the Philippines, with 912,000.

More than 5,000,000 American Juniors are at work in this organization of the American Red Cross. Their example is held out by the American Red Cross during the Tenth Annual Roll Call for membership, as one for all Americans to endorse by joining the parent organization during the period November 11 to 25 this year.

FRIDAY, Nov. 12, 1926

Its Industrial and Educational Service Spreads Throughout the United States.

Signs that the United States is awake to the menace of its increasing accident toll are apparent in the growing interest in first aid instruction as offered by experts of the American Red Cross.

Approximately 20,000 Juniors and seniors completed the first aid course during the fiscal year, passed rigid examinations and received Red Cross First Aid certificates. This represents an increase of 2,500 over the preceding year, and this gain is attributed to the emphasis on health education by various public bodies including not alone the American Red Cross and Government agencies, but life and accident insurance companies, and athletic and recreational groups.

In Dallas, Texas, playground supervisors are required to hold First Aid certificates. In many high schools the subject is included in the regular curriculum. In order to assist in training instructors for this phase of the work, special courses have been conducted in the summer schools of such leading institutions as the University of Maryland and the University of Virginia. Instruction was continued during the year at Loyola University, New Orleans; University of California, San Francisco; University of Kentucky; Temple University, Philadelphia; Peabody Teachers' College and similar educational centers.

Work with the public utilities group has shown an exceptional increase during the year. Classes conducted by fourteen of the associated Bell Telephone companies were continued with increased interest and a number of the companies sponsored intensive courses in first aid for instructors.

The first aid instruction car of the Red Cross was busy throughout the year. In the 125 cities visited by the car 900 meetings were held with an aggregate attendance of 94,000 persons.

Membership of the people in the American Red Cross makes such services possible, the annual opportunity of pledging support through membership being offered in the Roll Call from November 11 to 25 this year.

LEGAL NOTICES

NOTICE OF SALE OF REAL ESTATE AT PRIVATE SALE

IN THE SUPERIOR COURT OF the State of California in and for the County of Alameda, Dept. No. 4. In the Matter of the Estate of Albert Uphill, deceased. No. 39417. Notice of Sale of Real Estate at Private Sale.

Notice is hereby given that ALBERT E. HILL, the undersigned administrator of the estate of Albert Uphill, deceased, will sell at private sale on or after the 9th day of November, 1926, all right, title and interest that the above named decedent had at the time of his death, and all the right, title and interest which the said estate has acquired in and to all those certain lots, pieces or parcels of land described as follows: All that certain lot, piece or parcel of land situated, lying and being in the County of Contra Costa, State of California, and described as follows:

Lot 13, as delineated upon that certain map entitled, "Subdivision of a portion of Acalanes Rancho, Contra Costa County, Cal." Filed February 1, 1910 in Map Book 2, page 44, in the office of the County Recorder of the County of Contra Costa, State of California.

Terms and conditions of sale: Cash in lawful money of the United States, ten per cent of the purchase price to be paid at the time of said sale and the balance on confirmation of said sale by said Superior Court.

All bids or offers must be in writing and may be left at the office of said administrator at room 1203 Central Bank Building, Oakland, California, or delivered to the administrator personally or may be filed in the office of the Clerk of the Superior Court of said Alameda County at any time after the first publication of this notice and before the making of the sale.

Dated, October 21, 1926.

ALBERT E. HILL,

Administrator of the Estate of Albert Uphill, deceased.

WALTER H. ELIASSEN & EDWARD R. ELIASSEN, Attorneys for Administrator, 1203 Central Bank Building, Oakland, California.

SUMMONS

In the Superior Court of the State of California, in and for the County of Contra Costa.

No. 12738.
Manuel Perera Rose, formerly known as Manuel Rosa Perera, plaintiff vs. Madeline Motta, Manuel Miguel Betancourt, Joseph A. Mello, also known as J. A. Mello, Joseph Dutra, also known as Jose Dutra, Frank Dutra, Margaret Dutra, Augustine Dutra, Bernice I. Dutra, Delphina Dutra as administratrix of the estate of John Dutra, deceased, John Doe, Jane Doe, and the Doe-Roe Company, a corporation, and also all other persons unknown claiming any right, title, estate, lien or interest in or to the real property described in the complaint adverse to plaintiff's ownership or any cloud upon plaintiff's title thereto, defendants.

Action brought in the Superior Court of the State of California, in and for the County of Contra Costa, and the complaint filed in said County of Contra Costa in the office of the Clerk of said Superior Court. C. D. Horner, attorney for Plaintiff, Richmond, California.

The People of the State of California, send greeting to Madeline Motta, Manuel Miguel Betancourt, Joseph A. Mello, also known as J. A. Mello, Jose Dutra, also known as Jose Dutra, Frank Dutra, Margaret Dutra, Augustine Dutra, Bernice I. Dutra, Delphina Dutra as administratrix of the estate of John Dutra, deceased, John Doe, Jane Doe and the Doe-Roe Company, a corporation, and also all other persons unknown claiming any right, title, estate, lien or interest in or to the real property described in the complaint adverse to plaintiff's ownership or any cloud upon plaintiff's title thereto, defendants.

You are hereby required to appear in an action brought against you by the above named plaintiff in the Superior Court of the State of California, in and for the County of Contra Costa, and to answer the complaint filed therein, within ten days (exclusive of the day of service) after the service on you of this summons, if served within the county; if served elsewhere, within thirty days, and you are hereby notified, that unless you appear and answer as above required, the plaintiff will take judgment against you for any money or damages demanded in the complaint, as arising upon contract or will apply to the court for any other relief demanded in the complaint.

Said action is brought to compel the above named defendants Madeline Motta, Manuel Miguel Betancourt, Joseph A. Mello also known as J. A. Mello, Jose Dutra also known as Jose Dutra, Frank Dutra, Margaret Dutra, Augustine Dutra, Bernice I. Dutra, Delphina Dutra as administratrix of the estate of John Dutra, deceased; John Doe, Jane Doe and the Doe-Roe Company, a corporation, and also all other persons unknown claiming any right, title, estate, lien or interest in or to the real property described in the complaint adverse to plaintiff's ownership or any cloud upon plaintiff's title thereto, to set forth the nature of their claim or claims, in or to the said real property and that such claim or claims be adjudged to be of no effect and void, and to quiet plaintiff's title to said real property and to determine all adverse claims of any and all of the defendants, and all persons unknown as aforesaid, in and to all those certain lots, pieces, parcels or tracts of land, situated, lying and being in the County of Contra Costa, State of California, and particularly described as follows, to wit:

Portion of Lot 17 as designated on the map entitled "Map of the San Pablo Rancho, accompanying and forming a part of the final report of the Referees in Partition," which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on March 1, 1894 and particularly described as follows:

Beginning at a stake on the North line of Road No. 2 or Alvarado Street from which a granite post set for Southwest corner of Lot 170 on north line of said street or road bears South 42° East distant 15.15 chains, thence according to the true meridian as follows: Along the Northern line of said Road No. 2 or Alvarado Street North 48° West 1.015 chains to stake, thence South 42° East 1.015 chains to stake, thence South 42° East 1.015 chains to stake and thence South 42° West 2 chains and 33 links to point of beginning.

Excepting Therefrom, the water rights conveyed in the deed from Manuel Rosa Perera to the Peoples Water Company a corporation, dated November 6, 1909, and recorded January 13, 1910 in Volume 5 of Miscellaneous records, at page 77.

Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California this 22nd day of July, 1926.

J. H. WELLS, Clerk.
W. F. PASSEY, Deputy Clerk.

SUMMONS

In the Superior Court of the County of Contra Costa, State of California.

No. 12855.
Action brought in the Superior Court of the County of Contra Costa, State of California, and the complaint filed in the office of the clerk of said County of Contra Costa.

Mary Elizabeth Shultz, plaintiff, vs. Albert J. Shultz, defendant.

The People of the State of California send greeting to Albert J. Shultz, defendant.

You are hereby directed to appear, and answer the complaint in an action entitled as above brought against you in the Superior Court of the County of Contra Costa, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment against you for any money or damages demanded in the complaint, as arising upon contract or will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California, this 27th day of September, A. D. 1926.

J. H. WELLS, Clerk.
S. Wells, Deputy Clerk.
Clare D. Horner, attorney for plaintiff.
